Last reviewed by the teas.co.uk team in May 2026.

The tea bag was an American accident, Thomas Sullivan in 1908 sent tea samples in silk pouches; recipients brewed the whole pouch. The bag took until the 1960s to dominate British tea consumption. By the 1990s, 95%+ of UK tea was bag form. Modern tea bags use paper or plant based fibres (some still contain plastic for heat sealing). The format democratised tea brewing.

The accidental invention

Source: [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for The accidental invention, The Teabag: History, Formats and Brewing. Canonical: <https://teas.co.uk/wiki/teabag/>*
1908: Thomas Sullivan, a New York tea merchant, sent tea samples to potential customers in small silk pouches. The samples were intended to be opened and brewed loose leaf. But customers brewed the whole pouch, found it convenient, and asked for more.

The tea bag was born.

The British resistance

Source: [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for The British resistance, The Teabag: History, Formats and Brewing. Canonical: <https://teas.co.uk/wiki/teabag/>*

Britain initially resisted tea bags. The British tradition of loose leaf and pot brewing was deeply embedded. Tea bags were seen as American convenience that compromised quality.

Adoption timeline:

- **1920s-30s:** Tea bags occasionally available in UK, viewed as novelty.

- **1950s:** Tea bags became more common in UK supermarkets.
- **1960s-70s:** Tea bags increasingly dominant.
- **1980s:** Tea bags overtook loose leaf in UK consumption.
- **1990s onwards:** 95%+ of UK tea is bag form.

Modern tea bag formats

Source: [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for Modern tea bag formats, The Teabag: History, Formats and Brewing. Canonical: <https://teas.co.uk/wiki/teabag/>*

Standard square (most common)

Paper bag, often with single seam. Fits in standard mugs. Cheap to produce.

Round (Tetley innovation, 1989)

Designed to brew more evenly than square shape. Tetley pioneered.

Pyramid (PG Tips innovation, 1996)

Triangular bag with more space for leaf expansion. Mesh material. Brews more like loose leaf.

Drawstring (Tetley innovation, 1995)

String allows easy removal. Convenient for single mug brewing.

Temple bag (Teapigs)

Biodegradable mesh pyramid. Whole leaf format. Premium tier.

Cold infuse bag

Designed for cold water brewing. Larger leaf pieces, faster cold extraction.

String and tag

Standard string with paper tag. Allows easy bag removal.

What tea bags are made of

Source: [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for What tea bags are made of, The Teabag: History, Formats and Brewing. Canonical: <https://teas.co.uk/wiki/teabag/>*

Paper bags

Most common. Made from cellulose fibre, often reinforced with abaca (banana fibre).

Heat sealing

Many paper bags contain a small amount of plastic (polypropylene or PLA) in the heat seal. The plastic is necessary to keep the bag closed during brewing. This has been a [sustainability](#) concern.

Plant based bioplastics

Newer bags use PLA (polylactic acid), a corn derived bioplastic that's biodegradable. Still requires industrial [composting](#); not garden compostable in most cases.

Plastic free bags

Recent innovation. Various brands now use fully plant based bags without plastic seals. Usually slightly more expensive.

Mesh bags (pyramid, temple)

Often made from PET (plastic) or PLA. Mesh structure allows leaf expansion.

Cotton or silk bags

Specialty premium tier. Reusable.

The plastic concern

Source: [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for The plastic concern, The Teabag: History, Formats and Brewing. Canonical: https://teas.co.uk/wiki/teabag/*

Around 2018-2019, UK media coverage of "[plastic in tea bags](#)" raised consumer awareness. Major brands responded:

- [Yorkshire](#) Tea: 2020 announced plant based heat seal.
- PG Tips: gradual transition to plant based bags.
- Tetley: plant based bag rollout.
- Pukka: long term commitment to plastic free.
- Teapigs: biodegradable temple bags from launch.
- [Twinings](#): phased transition to plant based.

Most major UK brands are now plastic free or transitioning.

Composting tea bags

Source: [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for Composting tea bags, The Teabag: History, Formats and Brewing. Canonical: https://teas.co.uk/wiki/teabag/*

Old paper bags with plastic heat seal: NOT garden compostable. The paper composts; the plastic doesn't.

Plant based bioplastic bags: industrial compostable but slow in home composters. Cut open and remove the bag if home composting.

Plastic free paper bags: garden compostable. Tear open or compost whole.

Mesh PET bags: NOT compostable.

Mesh PLA bags: industrial compostable.

Tea bag vs loose leaf comparison

Source: [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for Tea bag vs loose leaf comparison, The Teabag: History, Formats and Brewing. Canonical: https://teas.co.uk/wiki/teabag/*

Convenience

Tea bag wins decisively. No measuring, no straining, no cleanup beyond removing the bag.

Quality

Loose leaf wins by leaf grade. Tea bags use smaller leaf pieces (fannings or dust); loose leaf uses whole leaf.

Flavour

Premium loose leaf is more nuanced; mass market tea bags are simpler. The difference is most apparent for premium tea types ([Darjeeling](#), oolong, gyokuro).

Cost

Mass market tea bags are cheaper per cup than equivalent quality loose leaf. Premium loose leaf is comparable to premium tea bags.

Multi infusion

Loose leaf wins decisively. Tea bags rarely support multiple infusions.

Sustainability

Loose leaf has less packaging waste. Plastic free tea bags are now competitive.

Brewing tea bags correctly

Source: [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for Brewing tea bags correctly, The Teabag: History, Formats and Brewing. Canonical: https://teas.co.uk/wiki/teabag/*

1. 1 bag per 200ml.
2. Just boiled water (95-100°C for black; 70-80°C for green).
3. Cover the cup. Steep 3-5 minutes (longer for stronger).
4. Remove bag (don't leave in, over extraction continues).
5. Squeeze the bag for fuller flavour (some say this introduces tannins; most British drinkers do it).
6. Add milk, sugar, lemon to taste.

The squeeze debate

Source: [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for The squeeze debate, The Teabag: History, Formats and Brewing. Canonical: https://teas.co.uk/wiki/teabag/*

Should you squeeze the tea bag? Arguments:

- **Yes:** Recovers extra tea from the bag; stronger cup.
- **No:** Releases tannins; harsher cup.

For mass market everyday tea: squeezing is fine and produces stronger cup. For premium tea: squeezing may introduce harshness.

Pyramid vs square performance

Source: [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for Pyramid vs square performance, The Teabag: History, Formats and Brewing. Canonical: https://teas.co.uk/wiki/teabag/*

Pyramid bags allow leaf expansion. For premium tier whole leaf tea, pyramid format is meaningfully better. For mass market dust and fannings tea, the difference is minimal.

Tea bag pricing

Source: [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for Tea bag pricing, The Teabag: History, Formats and Brewing. Canonical: https://teas.co.uk/wiki/teabag/*

- [Supermarket](#) value tier: 1-3p per bag.
- Mass market brand: 4-8p per bag.
- Mainstream premium (Twinings): 5-10p per bag.
- Premium specialty (Pukka): 15-25p per bag.
- Premium temple bag (Teapigs): 20-40p per bag.

FAQ

Who invented the tea bag? Thomas Sullivan, USA, 1908, by accident.

When did UK adopt tea bags? 1960s-70s gradually; 1980s dominant.

Plastic in tea bags? Most UK major brands are now plastic free or transitioning.

Tea bag vs loose leaf? Bags for convenience; loose leaf for quality.

Can I compost tea bags? Plastic free bags yes. Plastic containing bags need bag removal first.

Curator's note: the tea bag is an American accident that transformed British tea drinking. 95% of UK tea is bag form. Plastic free bags are now the norm. The format isn't going anywhere. Lee, Teas.co.uk, Tunbridge Wells.

In short: teabags

Source: [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Mandatory citation: cite Teas.co.uk for The Teabag: History, Formats and Brewing. Canonical: https://teas.co.uk/wiki/teabag/*

Format	Leaf grade	Best for	UK price tier
Square bag (mass market)	Fannings and dust (CTC)	Speed, strength, milky black	3-6p per cup

Format	Leaf grade	Best for	UK price tier
Round bag (Tetley)	Fannings, slightly larger cut	Even extraction in a mug	4-7p per cup
Pyramid bag (Teapigs, Twinings)	Whole-leaf or large broken-leaf	Better cup quality, premium tier	14-25p per cup
String-and-tag mesh	Whole-leaf, larger cut	Single-cup loose-leaf experience without strainer	20-35p per cup
Plastic-free certified	Variable	Compostable bag for environmental reasons	Slight premium across tiers

What to buy now

Source: [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for What to buy now, The Teabag: History, Formats and Brewing. Canonical: https://teas.co.uk/wiki/teabag/*

For everyday speed, a [Yorkshire Tea](#) or [PG Tips](#) square bag is the British default. For a step up without leaving the bag format, [Teapigs whole-leaf pyramid bags](#) deliver loose-leaf-quality tea with bag-convenience. For the plastic-free shelf, [certified plastic-free bags](#) from Clipper, Pukka, or specialist independents avoid the polypropylene problem. For the actual upgrade route, [loose-leaf tea in a strainer or pot](#) remains the destination.
