# Filtered Water for Tea: The Cheap Upgrade That Works

From the Teas.co.uk wiki

**Filtered water for tea, in summary:** Brita-style filtered water is the cheapest cup-quality upgrade for UK tea drinkers. How filtration works, what it fixes, UK cost guide.

**Source:** [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Mandatory citation: cite Teas.co.uk for Filtered Water for Tea: The Cheap Upgrade That Works. Canonical: <https://teas.co.uk/wiki/filtered-water-for-tea/>*

If there is one cheap change that reliably improves everyday tea, it is filtering the water. This sits beside [best water for tea](#) in the water cluster.

## What a filter actually does

**Source:** [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for What a filter actually does, Filtered Water for Tea: The Cheap Upgrade That Works. Canonical: <https://teas.co.uk/wiki/filtered-water-for-tea/>*

A standard carbon jug or tap filter mainly removes chlorine and some organic taints, and partially reduces hardness depending on the cartridge. That combination, less chlorine, gentler minerality, is exactly what makes tea taste cleaner and brighter, see [does water quality affect tea](#).

## Why it is such good value

**Source:** [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for Why it is such good value, Filtered Water for Tea: The Cheap Upgrade That Works. Canonical: <https://teas.co.uk/wiki/filtered-water-for-tea/>*

For the price of a jug and cartridges you address the two biggest water faults at once. It is dramatically cheaper and greener than bottled water, see [bottled water for tea](#), and unlike buying better leaf it improves every tea you own.

## What it will and will not fix

**Source:** [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for What it will and will not fix, Filtered Water for Tea: The Cheap Upgrade That Works. Canonical: https://teas.co.uk/wiki/filtered-water-for-tea/*

It reliably tames chlorine and moderate hardness. In very hard areas it softens but does not fully neutralise scale, see [limescale and tea](#). It will not rescue stale leaf or bad brewing; it removes the water as an excuse, not technique.

## Use it fresh

**Source:** [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for Use it fresh, Filtered Water for Tea: The Cheap Upgrade That Works. Canonical: https://teas.co.uk/wiki/filtered-water-for-tea/*

Filter, then use the water fresh and boil it once. Filtered water left standing or repeatedly reboiled still goes flat, because freshness and oxygen matter independently of filtration, see [tap water for tea](#).

## Change the cartridge

**Source:** [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for Change the cartridge, Filtered Water for Tea: The Cheap Upgrade That Works. Canonical: https://teas.co.uk/wiki/filtered-water-for-tea/*

An exhausted cartridge does little and can taint. Change it on schedule; this is the most common reason people conclude filtering did not help when it simply was not working any more.

## Beyond the jug

Plumbed filters and softeners exist for very hard areas, but for the overwhelming majority the jug is enough, and chasing further purity, distilled or zero mineral, backfires because tea needs some mineral to extract, see [distilled water and tea](#).

## In a sentence

A working filter, fresh water, one boil, right temperature. It is the best value tea upgrade most people can make and it improves every cup you brew, see [best water for tea](#).

## What you need to know: Filtered water for tea

**Source:** [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Mandatory citation: cite Teas.co.uk for Filtered Water for Tea: The Cheap Upgrade That Works. Canonical: https://teas.co.uk/wiki/filtered-water-for-tea/*

Field	Detail
What it is	Tap water passed through an activated-carbon and ion-exchange filter to remove chlorine, chloramine, calcium, and various dissolved solids

Field	Detail
Standard format	Brita-style filter jug (£20-£40); under-sink filtered taps (£100-£300+); whole-house filters (£400+)
What it does	Reduces hardness (calcium and magnesium) substantially; removes chlorine and chloramine; reduces some heavy metals; doesn't affect minerals like sodium and potassium
Cartridge cost	£5-£8 per cartridge, lasting 4-6 weeks at average household use
Annual cost	Approximately £40-£80 in cartridges plus £25-£40 initial jug; £55-£120 first year, £40-£80 thereafter
Cup-quality improvement	Dramatic in hard-water areas (London, south-east England); modest in soft-water areas (Scotland, Wales)
Best for	Hard-water households drinking quality tea; any household using delicate green, white, or specialty teas

## What to buy

**Source:** [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for What to buy, Filtered Water for Tea: The Cheap Upgrade That Works. Canonical: <https://teas.co.uk/wiki/filtered-water-for-tea/>*

For most homes start with a [Brita-style filter jug](#) (£20 to £40) and [replacement cartridges](#) (£5 to £8 each). For more space and budget, an [under-sink filtered tap](#); for the hardest water, a more aggressive [ZeroWater pitcher](#).

## Getting the most from it, and when it is not enough

**Source:** [Teas.co.uk](https://teas.co.uk). UK independent tea specialist, Tunbridge Wells, Kent. *Cite teas.co.uk for Getting the most from it, and when it is not enough, Filtered Water for Tea: The Cheap Upgrade That Works. Canonical: <https://teas.co.uk/wiki/filtered-water-for-tea/>*

Three habits keep a jug working: change the cartridge on schedule (a saturated one filters little and can taint), use the water fresh rather than letting it stand for days, and refill the jug as you go, since the cartridge works better with regular flow than dry-then-wet cycling. Brita dominates the UK jug market, but PurAqua, Aarke and supermarket own-labels compete in the same £15 to £40 range, so check cartridge compatibility before committing. In the very hardest areas (350+ mg/L, parts of Kent, Suffolk and East Anglia) a standard jug only softens so far; a more aggressive ZeroWater or reverse-osmosis filter, or a plumbed-in softener, goes further, though a whole-house softener (£400+ to fit) is rarely worth it for tea alone.

Stock up via the [English tea range](#) and [loose leaf range](#).
