What single origin means

Tea from one garden, region or estate, often one harvest, showing the character of that place and time, its terroir. It varies year to year, which is the point, not a flaw, see [single origin](#).

What a blend is for

A blend combines teas to hit a consistent flavour and strength every box, all year, regardless of harvest variation. That reliability is genuine craft, not a compromise, see [black tea](#).

Why neither wins

Single origin answers "what does this place taste like"; a blend answers "give me the same good cup every time". Different questions, both legitimate, see [the tasting guide](#).

For learning to taste

Single origin teas are the better teaching tool because they express clear, distinct character; blends are smoothed and harder to read. Learn on single origin, see [how to taste tea](#).

For everyday reliability

A good blend, English Breakfast, a house builders blend, is the better daily driver: consistent, robust, milk friendly, see [milk in tea](#).

Quality exists in both

There is superb and poor single origin, and superb and poor blending. The category does not guarantee quality; the maker does.

Quick take

Single origin for character, place and learning; blends for consistency and everyday dependability. Own both for different moments, see [first vs second flush](#).

Common questions

Is single origin always better quality? No. It is more expressive and variable. Quality depends on the lot and the maker, not the category.

Why does my single origin taste different this year? Because it should. It reflects a specific harvest; year to year variation is the feature, not a fault.

Are blends lower quality? No. Consistent blending to a target across harvests is a genuine skill, and the best blends are excellent.

Which should a beginner buy? Both, deliberately: a blend for daily reliability and one single origin to taste against it and learn what you actually like.

The bottom line

Single origin for character, place and learning; blends for consistency and everyday dependability. They answer different questions and most committed drinkers keep both. Single origin is often dearer partly for scarcity and prestige rather than quality, so a dependable blend is the value choice for daily volume; judge the lot and the maker by the specifics, estate, flush, year and freshness, not the category word.
