Line	Attribution	The note
The eleven rules for a perfect cup	George Orwell, essay	Genuine, and genuinely opinionated
"You can never get a cup of tea large enough..."	C. S. Lewis	Real, often trimmed in quoting
"...the hour dedicated to tea"	Henry James	Authentic, frequently paraphrased
Gladstone's tea lines	Attributed, contradictory	Cited both ways; treat with care
The "if you are cold, tea will warm you" set	Widely misattributed	Popular, sourcing shaky

The real sources, line by line

It is worth going through the famous tea lines properly, because the interesting part is how reliably they drift from their origin. George Orwell's essay on the perfect cup is the gold standard of a checkable tea quotation: a real published piece, opinionated to the point of being combative, almost always quoted in fragments that soften its bossiness, so the version people share is a tamed paraphrase of a sharper original, see [how to](#)

[make tea](#). The C. S. Lewis line about never having a cup of tea large enough or a book long enough is authentic, from his own writing, but the textbook case of a quote trimmed for the mug, the punchy half surviving and the qualifying clause dropped. Henry James's line about the hour devoted to afternoon tea is real, from his fiction, routinely smoothed in paraphrase. Gladstone's tea remarks are the cautionary case, attributed in contradictory forms that cannot all be original, which is exactly the signal that a quote has entered folklore. And the large family of cosy "if you are cold, tea will warm you" lines is the clearest warning of all: beloved, endlessly shared, and sourced to nobody verifiable.

Why tea attracts quotes, and the source test

Tea accumulates quotations because it sits at the exact intersection that produces quotable lines: domestic and universal, so everyone has a relationship with it; associated with pause, comfort and civility, so it carries weight beyond a hot drink; and bound up with British national identity, which invites grand and self-deprecating statements alike. That combination, ordinary enough for anyone to claim, freighted enough to feel profound, is precisely the soil in which apocryphal quotes flourish, because a warm sentiment about tea sounds plausible from almost any beloved writer, so it gets attached to one. The practical test takes seconds: a genuine literary quotation can be traced to a specific work, an essay, a novel, a letter, while a folklore quote is sourced only to a name, to "anonymous", or to a dozen contradictory names at once. If you cannot name the work in one line, treat the quote as decorative rather than evidential and attribute it as "often attributed to" rather than a flat name. Enjoy the lines freely, but weight them by source, see [tea myths debunked](#).
