

Oreo Spooky: The Halloween Edition Explained

From the teas.co.uk wiki

Oreo Spooky: The Halloween Edition Explained, in summary: Familiar cocoa wafers and vanilla flavour filling, dressed for Halloween with spooky embossing and a filling coloured by red radish and paprika extract. Dunk for a second, no longer, and buy it while the season lasts.

Last reviewed by the teas.co.uk team in September 2026.

Oreo Spooky is the everyday build in a seasonal costume. The colour in the filling comes from red radish concentrate and paprika extract, according to the published ingredient list, and the wafers carry Halloween embossing; the rest follows the familiar design.

What the costume changes

The name tells you exactly what is inside: cocoa sandwich cookies and a vanilla flavour filling, in a 154g pack for Halloween. Two dark wafers, a sweet centre and the shape nearly every rival sandwich biscuit now copies. What sets this pack apart is the dressing. The wafers are stamped with spooky designs, and the filling is tinted using red radish concentrate and paprika extract, both named on the published ingredient list.

Otherwise that list reads much as you would expect: wheat flour, sugar, palm and rapeseed oils, wheat starch and fat-reduced cocoa powder, with soya lecithins as the emulsifier, so wheat and soya are both named. On a seasonal edition it is still worth reading the box in your hand rather than assuming it matches the everyday pack, because the current packaging is the authority on a limited run.

A one-second dunk

The wafer is thin, hard and open in the crumb, so liquid races through it. It breaks with a real crack, which is half the pleasure, and it survives about a second in the mug; most dunks that fail have simply gone on a second too long. Grip it at the rim of the wafer, as the warm filling loosens and the halves can slip.

Milk buys you a little more time than tea, being colder and carrying fat that slows how fast the wafer drinks. Twisting the cookie first helps even more, because a bare wafer is half the thickness and has no softening filling to let go. Eat the creme side dry and [dunk](#) the plain half, and you get two rather different [biscuits](#) out of one.

Pouring for a Halloween table

If you are drinking rather than dunking, match the wafer's dark, slightly bitter cocoa rather than the sugar. A strong [black tea](#) with milk, or an unsweetened black coffee, meets it on its own terms and keeps the sweet centre in check. Sweet, syrupy drinks only pile more sugar onto a plate that already has plenty of it.

A seasonal pack like this has a short run, so pick it up when you spot it rather than hoping to find it again in March. For a party, set the pack out beside a pot of strong tea and a jug of cold milk and let guests decide whether to dunk or twist. The embossed wafers do the decorating for you.

FAQ

What colours the filling in Oreo Spooky? The published ingredient list names red radish concentrate and paprika extract.

Is Oreo Spooky the same recipe as the original? It follows the familiar build of cocoa wafers and a vanilla flavour filling, with added colouring and seasonal embossing. Read the current pack for the exact list.

How long can you dunk a Spooky Oreo? About a second. Thin and open in the crumb, it soaks through almost at once.

Is milk or tea better for dunking? Milk. It is colder and its fat slows absorption slightly, which buys a little extra time.

Can I buy Oreo Spooky all year? No. It is a Halloween-season pack printed for a short window, so pick it up while it is on the shelf.

Curator's note: The children will want to see the coloured filling, so open a few up for them first, then give the plain halves a one-second dip in cold milk. Any longer and it ends up at the bottom of the glass. Lee, teas.co.uk, Tunbridge Wells.
