Citrus bergamia is a small Mediterranean citrus, hybrid descent from sour orange and citron. The fruit is yellow green, smaller than an orange. Grown almost exclusively in southern Italy (Calabria region) where climate suits cultivation.

The fruit isn't typically eaten, too sour. The peel oil is the valuable product.

Bergamot is a fragrant citrus fruit (*Citrus bergamia*), grown largely in Calabria in southern Italy, whose aromatic rind oil gives [about Earl Grey](#) its distinctive floral, perfumed, slightly bitter lift; the [black tea explained](#) base supplies all the body and caffeine, and bergamot adds none, the plant and process clarity the bergamot reference keeps. It is not a flavour invented for tea but a real fruit with a genuinely distinctive oil, which is why a good Earl Grey tastes integrated rather than synthetic.

## Real scenting versus cheap flavouring

The single biggest quality lever in an Earl Grey is whether the bergamot is real cold pressed oil worked into the leaf or a cheap synthetic flavouring sprayed on top: the genuine version stays integrated and lifts the tea down to a cool cup, while the sprayed version is loudest dry and hot then thins or turns soapy, the cooling cup test the scented versus flavoured framing applies. Price correlates loosely but the taste test is decisive, the same judge the cup standard the [brand](#) and flavour pages keep, and it is why two Earl Greys at different prices are genuinely different drinks.

## How to brew it, and where it fits

Treat it by its black tea base: water just off the boil and three to three and a half minutes, not over steeped, because bergamot turns harsh and the tea bitter if stewed; many drinkers take it without milk to keep the citrus clear, though milk is fine on a robust base, the brewing logic the [caffeine, explained](#) and brewing

pages set out. It is the classic refined alternative to a builders' brew and a natural partner to lemon led cakes and an [afternoon tea](#) spread, pairing the [biscuits](#) and [breakfast](#) pages also note.
