

Cinnamon Tea

From the Teas.co.uk wiki

Cinnamon tea, in summary: Cinnamon tea is a sweet, warming, caffeine free cup. The one decision that matters is Ceylon versus Cassia (coumarin); the blood sugar evidence is modest, not a treatment.

Cinnamon tea is a sweet, warming, naturally caffeine free cup that pairs beautifully with apple, ginger or vanilla. It has a modest clinical evidence base behind its blood sugar reputation, but the genuinely important thing to know is practical: not all cinnamon is equal. Ceylon and Cassia cinnamon have meaningfully different safety profiles for daily use.

What cinnamon tea is

Cinnamon tea is the infusion of cinnamon bark in hot water, sometimes alone, sometimes blended with other herbs and tea bases. Two species are sold:

- **Ceylon cinnamon (*Cinnamomum verum*).** Native to Sri Lanka. Soft, layered, papery bark. Sweet refined flavour. Lower coumarin content. Often called "true cinnamon."
- **Cassia cinnamon (*Cinnamomum cassia*).** Native to southern China and Vietnam. Hard, thick bark. Bolder flavour, slightly more bitter. Higher coumarin content (potentially harmful in large daily doses).

UK [supermarket](#) cinnamon is almost always Cassia (cheaper, more available). Ceylon cinnamon is sold separately as a premium option, usually labelled clearly.

The coumarin problem

Coumarin is a naturally occurring compound in Cassia cinnamon. In high doses it can stress the liver in sensitive individuals. The European Food Safety Authority sets a tolerable daily intake at 0.1mg per kg of body weight; for a 70kg adult that's about 7mg of coumarin a day, roughly 1-2 teaspoons of Cassia powder. Ceylon cinnamon contains roughly 1/100th the coumarin of Cassia, so daily Ceylon consumption is essentially unrestricted from a coumarin perspective.

Practical takeaway: if you drink cinnamon tea daily, switch to Ceylon. If you're using it occasionally (a cup here and there), Cassia is fine.

Ceylon versus Cassia, the one decision that matters

	Ceylon (Cinnamomum verum)	Cassia (Cinnamomum cassia)
Bark	soft, layered, papery	hard, thick
Flavour	sweet, refined, less bitter	bolder, slightly more bitter
Coumarin	roughly one hundredth of Cassia; daily use essentially unrestricted	higher; liver risk in large sustained doses
UK shelf	premium, usually labelled clearly	the cheap default

The blood sugar evidence

Some small trials and a 2019 meta analysis suggest cinnamon modestly supports fasting glucose and insulin sensitivity in type 2 diabetes. The effect is real but small, the trials used concentrated cinnamon extract rather than a brewed cup, and cinnamon is not a substitute for diabetes medication. Treat a daily cup as a pleasant warming drink that may sit alongside diet, exercise and prescribed treatment, not as a remedy, and if you manage diabetes talk to your GP before drinking it daily. Cinnamon is also credited with antioxidant and heart effects, but the human evidence for a brewed cup is weak; enjoy it as a warming spice cup, not a supplement.

How to brew cinnamon tea

Method 1: Stick infusion (best flavour)

- 1 small cinnamon stick (preferably Ceylon)
- 250ml just boiled water
- Steep 10 minutes (covered)
- Optional: honey, lemon, slice of fresh ginger

The stick can be reused for a second cup with longer steeping (15-20 minutes for the second infusion).

Method 2: Powder infusion (faster)

- ½ tsp Ceylon cinnamon powder
- 250ml just boiled water
- Stir and steep 5-7 minutes
- Strain through fine cloth (powder will settle but some sediment remains)

Powder produces a more intense cup but is gritty unless strained.

Method 3: Cinnamon [black tea](#) blend

Add a snapped cinnamon stick to a black tea base ([Yorkshire](#), [English Breakfast](#)). Brew normally. The cinnamon adds warmth without dominating.

- **Liver and Cassia.** Heavy daily Cassia consumption is best avoided due to coumarin, especially with a liver condition; choose Ceylon for daily drinking.
- **Medication, pregnancy and children.** Cinnamon may interact with diabetes medication and blood thinners. If you take regular medication, are pregnant or breastfeeding, or are buying for children, check with a pharmacist or GP before drinking it daily, and avoid concentrated cinnamon supplements.
